Parent properties

display: enables flex context for all direct children.

```
.container{
  display: flex;   // or inline-flex
}
```

flex-direction: sets the main-axis.

row

column

row-reverse

column-reverse

flex-wrap: allows the items to wrap as needed.

no-wrap

wrap

wrap-reverse

Requires width/flex-basis

flex-flow: flex-direction flex-wrap;

place-content: align-content justify-content;

justify-content: defines alignment along the main axis.

flex-start

flex-end

center

space-between

space-around

space-evenly

When flex-direction is reverse, start and end are also reversed

align-items: defines alignment along the cross axis.

flex-start

flex-end

center

stretch

baseline

When flex-direction is column,
justify-content changes to vertical and align-items to horizontal

align-content: aligns multiple lines, like justify-content does with individual items.

cross axis + flex-wrap

flex-start

flex-end

center

stretch

space-between

space-around

Children properties

order: changes the order of flex items.

```
.item {
  order: 3   // the default is 0
}
```

flex-grow: allows item to grow using remaining space.

.item-1 { flex-grow: 0}
//default

.item-1 { flex-grow: 1}

Tip: If all items have flex-grow: 1, the remaining space is distributed equally.

flex: flex-grow flex-shrink flex-basis;

flex: initial; -> flex: 0 1 auto;
flex: auto; -> flex: 1 1 auto;
flex: none; -> flex: 0 0 auto;
flex: value; -> flex: value 1 0%;

flex-shrink: defines the ability for a flex item to shrink.

```
.one { flex-shrink: 1; }
.two { flex-shrink: 2; }
.three { flex-shrink: 3; }
.four { flex-shrink: 4; }
```

Tip: Defaults to 1. The highest the value the more it shrinks compared to siblings.

flex-basis: sets the default size of a flex item. It accepts:

- specific values : pixels, rm, %
- auto : defaults to width or height property
- content : automatic sizing, based on its content
- global values : inherit, initial, unset

align-self: overrides default alignment (or the one specified by align-items) for a specific item.
